

Cardo Launches Scala Rider Q2 MultiSet PRO

CARDO SYSTEMS, A MARKET LEADER IN WIRELESS BLUETOOTH communications for motorcycle helmet headsets, has announced the introduction of an enhanced intercom communication product, the scala rider® Q2™ MultiSet PRO.

The Q2 MultiSet PRO enables uninterrupted bike-to-bike and passenger-to-rider communication through a comfortable intercom head-rest system. The technology allows true simultaneous talking between two parties. Through its advanced multi device connection technology, users can independently place mobile calls, listen to integrated FM radio or MP3 music and also use the device as a person-to-person intercom. GPS device interactivity is included, and riders can receive GPS voice instructions through the headset without having to manually perform any operations.

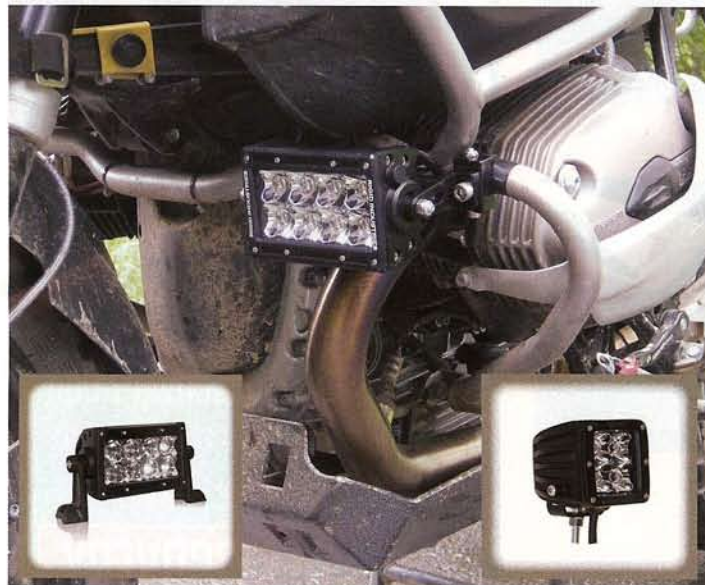

Further functionality of the Q2 PRO includes up to 8 hours of continuous talk time, providing riders with uninterrupted service for extended journeys. Joining the worldwide, top-of-the-line of G4 scala-rider® PowerSet and the scala rider® TeamSet PRO, the new and improved scala rider Q2® PRO will enhance the best-selling line of Q2 motorcycle helmet headsets.

The new Cardo scala rider Q2™ MultiSet PRO is now available through selected distributors, retail outlets, specialty motorcycle shops, and directly from the Cardo Systems web site at www.cardosystems.com. For more information call (412) 788-4533.

Rigid Industries LED Lights

BLACK DOG CYCLE WORKS IS PLEASED TO ANNOUNCE THE AVAILABILITY OF RIGID INDUSTRIES LED LIGHTS FOR MOTORCYCLE applications. Rigid Industries is an industry leader with the most advanced optics and circuit board technology in the business. They are extremely rugged and made in the USA as well as offer a lifetime warranty. Designed to last up to 50,000 hours with an unbreakable 100 percent optically clear lexan lens cover, these lights will be there when you need them. The "Dually" light measures only 3"x3"x3" and is perfect for dual sport or adventure touring bikes. It puts out a whopping 1300 lumens while only drawing 15 watts per light, which is less than the brake lights on most bikes. The new "D2" Dually, also a 3" x 3" model, offers even more lumens at 2600 per light while drawing a mere 28

watts. Rigid lights are available in numerous colors including white and amber and in a spot or flood pattern. For the larger twin cylinder bikes with more mounting room, like the BMW GS, a 4" light is available which fits perfectly on the crash bars. These lights are designed for the rider who wants to see better at night and have higher visibility during the day. All of Rigid's lights are race tested and proven tough. Rigid Industries LED lights are available through Black Dog Cycle Works at www.blackdogcw.com or 208-263-0438. Prices vary.

Black Dog Cycle Works designs and manufactures custom accessories for adventure touring motorcycles as well as offers quality aftermarket parts from various suppliers. They test what they sell and their passion for adventure riding and providing their clients with excellent customer service is well established in the industry. Personalized service and knowledgeable, experienced staff who are able to advise customers how to set up their bikes to meet their individual needs are what sets BDCW apart from others in the marketplace.
